Project: Development of a HR application "CoConsult" for human resources management in a company (academic project):

📅 January to May 2024

Description: Design and development of the "CoConsult" web application, an HR platform dedicated to human resources management. It offers user-friendly tools to simplify recruitment, employee management, and performance tracking.

Technologies used: Spring Boot, Angular, JavaScript, Bootstrap, HTML, CSS, MySQL

EXPERIENCE

Summer Internship

SMARTUP

📅 July 12, 2023 – August 23, 2023 📍 Chargaia, Tunis

Description: Creation of a backend application using Spring Boot to provide web services via REST API.

End-of-Studies Internship

3IA-Technology

📅 February 6, 2020 – June 27, 2020 📍 Ezzahra, Ben Arous

Training Internship:

Gas Compression and Processing Station EI BORMA

📅 January 16 - January 30, 2019 📍 Tataouine, Tunisia

Introductory Internship:

Tunisian Electricity and Gas Company, TATAOUINE district

📅 January 8, 2018 - February 3, 2018 📍 Tataouine, Tunisia

EDUCATION

Private Higher School of Engineering and Technologies - ESPRIT

Software Engineering

📅 2022 – Present 📍 Ariana, Tunisia

Higher Institute of Technological Studies - ISET DJERBA

Bachelor's Degree in Electrical Engineering

Specialty: Automation and Industrial Computing

📅 2017 - 2020 📍 Djerba, Tunisia

PROJECTS

Project: Development of a web-desktop application for agricultural management "INFINITYFARM" (academic project):

October to December 2023

Description: Design and development of the INFINITYFARM web application, a comprehensive solution for agricultural management, offering user-friendly tools to simplify farmers' daily tasks.

Technologies used : Java, JavaFX, Symfony, JavaScript, Bootstrap, MySQL

Project: Development of a web application for airport management (academic project)

January to May 2024

Description: The project involves developing AirManage, a .NET MVC web application to improve airport management efficiency. AirManage provides a user-friendly interface and robust backend to streamline tasks such as flight scheduling, passenger management, and resource allocation.

Technologies used: .NET MVC, Entity Framework, MySQL

SKILLS

Frameworks: Spring, Angular, React, Symfony, .NET

Programming Languages: HTML5, CSS3, JAVASCRIPT, TYPESCRIPT, C, C#, JAVA

Databases: MySQL, PostgreSQL

Tools: Swagger, Postman

Methodologies: Agile (Scrum)

Design : UML 2.0

Operating Systems: Windows, Linux
