

SUMMARY

Java Full-Stack Developer specializing in Spring Boot and Angular, with strong expertise in building scalable RESTful APIs, secure enterprise applications, and database-driven systems. Experienced in containerization, CI/CD workflows, and delivering maintainable, production-ready software solutions.

EDUCATION

- ESPRIT – Private Higher School of Engineering and Technologies

2022 – 2025

Engineering Degree in Computer Science – Focus: Software Engineering and Web Technologies
- ISSET Djerba – Higher Institute of Technological Studies

2017 – 2020

Bachelor’s Degree in Electrical Engineering

TECHNICAL SKILLS

Backend	Spring Boot, Spring Security, JPA/Hibernate	DevOps	Docker, Jenkins, GitHub Actions
Frontend	Angular, React, Bootstrap, Tailwind	Monitoring	Prometheus, Grafana
Databases	MySQL, PostgreSQL, SQL Server	Testing	Unit Testing, Junit, Mockito

EXPERIENCE

- Freelance Full-Stack Developer

2025 - Present, Remote

 - Designed and delivered production-ready full-stack applications for real clients.
 - Designed scalable RESTful APIs with secure JWT-based authentication and optimized database access.
 - Tech:** Spring Boot, Angular, MySQL, Docker, Git
- End of Studies Project, Telnet Holding

Feb – Jul 2025, Tunis

 - Developed cross-platform system to test and monitor BLDC motors for drones with real-time data acquisition.
 - Tech:** Flutter, Express.js, SQLite, Python, Serial Communication
- Software Engineer Intern, SHAMASH IT

Jul – Aug 2024, Tunis

 - Built platform for managing remote work requests with role-based access control.
 - Tech:** .NET Core, React, Entity Framework, SQL Server
- Summer Intern, SMARTUP

Jul – Aug 2023, Tunis

 - Designed scalable backend with Spring Boot and PostgreSQL.
 - Tech:** Spring Boot, PostgreSQL

PROJECTS

- Jibli – Food Delivery Application [View Project]

 - Designed and implemented a scalable food delivery system enabling real-time order processing, delivery tracking, and multi-role platform management.
 - Deployed and monitored the application in production on a VPS using Nginx reverse proxy, SSL encryption, and a full observability stack with Prometheus and Grafana.
 - Tech:** Spring Boot, Flutter, MySQL, Redis, Nginx, VPS Deployment, SSL Certificates, Prometheus, Grafana
- CoConsult ERP [GitHub]

 - Designed an ERP module for automating recruitment workflows and CV analysis.
 - Developed a secure backend using Spring Security with JWT authentication.
 - Tech:** Spring Boot, Angular, MySQL, Spring Security
